Skills and Qualifications

- **FE Electrical & Computer Exam** passed July 14, 2026
- Software: LTspice, Altium, PSCAD, SolidWorks, Word, Excel, PowerPoint, Git
- Programming Languages: MATLAB, Python, C++

Education

Bachelor of Science in Electrical Engineering **September 2024 – June 2027**

Seattle Pacific University, WA

- **GPA:** 3.98 out of 4.00
- Relevant courses: Electronics 2, Circuits 2, Electricity and Magnetism, Power Systems, Signal and System Analysis, Microcontroller System Design
- **Minor in Mechanical Engineering**

Associate of Science **September 2021 – June 2024**

North Seattle College, WA

- Relevant courses: Physics 3, Linear Algebra, Vector Calculus, Differential Equations

Experience

Electrical Engineering Technical Assistant **May 2026 – Present**

Seattle Pacific University, Seattle, WA

- Maintain the electrical engineering parts inventory.
- Assist electrical engineering faculty prepare components and equipment for student labs.

Hardware Store Sales Clerk **August 2025 – Present**

Tweedy and Popp Hardware at Crown Hill, Seattle, WA

- Help customers select products (in-person and over the phone).

Electrical Engineering Lab Assistant **September 2025 – December 2025**

Seattle Pacific University, Seattle, WA

- Assist during lab sessions for Circuits 1 with 30 students.
- Supported students using oscilloscopes, multimeters, and function generators to troubleshoot breadboard circuits.

Tutor **January 2024 – July 2024**

Math and Science Learning Center, North Seattle College, WA

- Led one-on-one tutoring sessions with students at a walk-in tutoring center.
- Coached students with problem-solving methods.

Projects

Flyback Converter 120VAC to 3.3VDC **March 2026**

- Designed PCB layout in Altium based on a schematic.
- Soldered surface mount components onto the PCB and successfully tested circuit with 120 V AC.

25 kHz Filter Circuit **March 2025**

- Designed a 2-stage Sallen-Key filter to isolate the 25 kHz component of a signal.
